SUMMARY

I am a FullStack Web Developer, with a passion to learn new and exciting programs and utilize them in my day-to-day coding. I have experience building applications with Ruby on Rails, Python Flask, and JavaScript, as well as React and Redux. I am comfortable working in a FullStack environment and can easily transition from coding in the Back End to the Front End with ease.

When not trying to create the next best Website, I'm usually working on cars, playing basketball, or improving on my photography!

SKILLS

JavaScript, reactJs, react-native, ruby, ruby on rails, redux, sql, Active record, HTML, CSS, SASS, Sinatra, Python3 , Bootstrap, flask, SQL Alchemy, Peewee, Selenium, Py Game, TKinter, nodeJs, expressJs, Sequalize, figma
